

FNI Proposal is wrong – Jenny Greenwell

Something is radically wrong with this picture:

- The Title 9 gym that cost \$16 Million is about 12 years old. Why would we demolish it?
- There is excess capacity at Andover now. Why are we building a larger facility?
- Why did we pay Gaynor for 2 years a "consulting fee"?
- The black male students in the BHSD are at 25% to 40% below the mean SAT/ACT scores. Why is that happening?
- Why do trustees accept campaign funds/endorsements from the MEA?
- Why didn't the trustees spend the \$50 million taxpayers allocated in sinking funds to maintain the buildings?
- Why are the trustees so fixated on building new buildings?
- Why would anyone renovate the 28,000 sf Doyle Center for administration offices?
- Where are the admin people sitting now that is so inadequate that we remodel the Doyle Center?
- Who paid in the \$800,000 fee to Fielding Nair?
- Is Gaynor a board member or affiliate of Fielding Nair?
- Why was Fielding Nair paid a fee multiple of other bidders?
- Why is our enrollment dropping when the SEMCOG studies info of 5 years ago called for increased enrollment?
- Who really cares if not enough students try out for varsity football at Andover?
- Why have our ACT/SAT scores dropped every year for the last 25 years?
- How did Andover graduate 40% more students per year in the 60's and 70's with higher SAT/ACT score than last year?
- Why don't resident taxpayers become more concerned with irresponsible School Board decisions?
- Why are local governments and school districts wasting our tax dollars and begging for MORE?
